**TEXTILE POSSESSING ANTILACERATION PROPERTIES**

Textile (1) possessing antilaceration properties, which  
is made from synthetic cables (2) sheathed with a  
10 polymer material, such as polyvinyl chloride, and  
includes, in the warp direction and the weft direction,  
metal cables (3, 4) sheathed with a polymer material  
having a different color from that of the polymer  
material for sheathing the synthetic yarns, wherein the  
15 warp and weft metal cables (3, 4) are uniformly spaced  
by a distance of (d, l) of less than 80 millimeters.
